Recover files from damaged drives, partition, USB memory sticks, SD cards, hard drives, CDs and DVDs. Remo Recover can restore up to 100% of the files in a selected folder and display all file attributes including the last modified, created and access time. MS Office 2010 MS Office 2010 CRM is Microsoft's answer to all the things you should and should not have done before you decided to unleash your power and get online. From basic functions such as creating a business card to complex features like using business intelligence for competitive marketing, you can accomplish all your tasks in one easy-to-use solution. The best way to introduce yourself to the program and make the most of its advanced features is by exploring the product itself, starting with the actual product tour. To go to the Tour Page, click the Start menu and point to Access, then click Microsoft Office 2010. From the list that pops up, select Microsoft Office 2010 Tour to go to the software Tour. You are now ready to learn how to create your first contact, follow with the screen videos and tutorials to learn how to create a compelling business card, and explore the financial tools to track, report and manage your finances. Introducing Outlook 2010 Outlook 2010 CRM makes managing a complete business easy, right from preparing and sending out a business card to communicating with employees and clients. As with all Office applications, there are three different ways to work with the software. You can use a keyboard, mouse or touch screen. Outlook 2010 is different than other Office versions because it includes a touch interface and incorporates a web-based infrastructure. Since it's a relatively new version, it still has a few bugs that can trip you up, so if you are new to the software, you might want to try using one of the other methods, as described below. Managing Contacts Using the Contact Manager you can create new contacts, edit existing contacts and add notes. To create a new contact, select Contacts from the Contact menu, or click the Contacts button from the toolbar. You can choose the type of contact you are creating, for example, you can create an Accountant, a Salesperson, a CFO, or any other business professional. You can either fill out information by hand or select an existing contact to use as a template. When you are done, click

Save Contact to complete the new contact'
