Photoshop CC also features a new method that, in the most cases, allows for better selections. With this new method, users can create more pronounced edges as the first drawing action, making it easier to turn on and off selection handles. With this feature, along with the Auto Mask tool, the selection window is also better equipped to select actual content, but keep unwanted areas like backgrounds or hair out of the selection. Highlights and clipped selections in the Layers panel are also returning in 2021. Adobe created the Brainstorm Insight Series with an idea to redesign a more affordable version of Photoshop and make it even more accessible to consumers. As a result, the first edition of Adobe Photoshop CS6, which has been offered for free throughout the year, has so many new features that even the same pros who rave over its power can't keep up with it. Photoshop Elements 7 adds a lot of new features and improvements to improve the user experience. Some of the new features are face recognition, intelligent auto, advanced image and smart object selection, enhanced exposure, black and white conversion, color match and more. And lastly, Adobe has also refreshed how it captures users' work for offline use. The switch to macOS 10.15 Catalina and the release of new Intel®-based Macs brought some welcome changes in the update of the macOS 10.15 operating system, including an upgrade to Apple's new ProMotion technology, which limits the use of external GPU displays or external monitors when a Mac is connected to an iMac-style external display wall. Publishers that use Adobe's software to create products for offline use, such as magazines, books, and other publications, can now take advantage of the new "Cloud Save" feature in both macOS 10.15 Catalina and Photoshop Elements. With the release of the Apple external monitor workaround, Adobe's team of app developers is now working to develop a compatible workaround for its CS4 and CS5 series of software. Adobe has provisionally removed an important update to CS5, a 'National Language' feature, that appeared in the CS4 update. The company has also committed to releasing a full update for the software by the end of 2020, to both Windows and macOS, will include the changes made by the Apple external monitor workaround. In the meantime, for Windows users partiularly, as Apple has licensed Adobe's workarounds to use as it sees fit, developers recommend that users steer clear of the CS4 updates to avoid any potential confusion.
